

# NAT SPOT

UNIVERSAL STAIN REMOVER COMPLETELY NATURAL ACTIVE AGAINST DIFFICULT STAINS

NAT SPOT is a stain removal product made with plant extracts and plant derivatives in a water base, without added perfumes.

Aspect	Liquid
Color	Clear
Odor	Characteristic, floral
pH at 20 ° C	$6.0 \pm 1.0$
Freezing temperature	Below -5 ° C
Biodegradability	Above 90%
Phosphorus (P) content	Totally free
Solubility in water	Complete (even in cold water)

NAT SPOT is easy to use, as is on the part of the garment to be treated. It removes many types of stains from any fabric, without contraindications or risks for humans and the environment thanks to its balanced composition based on plant extracts. It has a high stain-removing power and has an effective solubilization in water for a wide range of stains. It eliminates sweat halos and odors, is effective against organic and greasy stains (inks, paints, etc.). It captures and disintegrates, until they are eliminated, even bad odors.

NAT SPOT is rapidly and readily biodegradable and non-flammable. It does not contain V.O.C. solvents, enzymes, bacteria, acids or bases, phosphates and preservatives. Non-toxic for aquatic organisms. Dermatologically tested.

NAT SPOT is ready for use on the area to be treated. Then wash in the washing machine or rinse manually.

NAT SPOT can be stored for 2 years. The container must always be tightly closed after use.

Plastic bottle with 150 ml content.

Box of 24 pieces.

8411015 = 150 g
