

SUEDE COLOR

SUEDE COLOR set is composed of very concentrated liquid colors containing high-finishing penetration solvents.

Aspect	Liquid
Smell	Characteristic
pH at 20°C	7 - 9
Solubility in Water	Good
Freezing temperature	Less than 0°C

YELLOW - ORANGE - RED - BLACK - DARK YELLOW - DARK BROWN - BLUE

SUEDE COLOR has an excellent covering effect, and acts delicately, leaving the suede soft.

SUEDE COLOR can be sprayed on suede to brighten them uniformly up or even to change their original colors.

Since these are basic colours, it is understood that they can be mixed together to obtain any desired colour tone.

To make the color uniformly bright:

spray SUEDE COLOR diluted with water or alcohol after dry-cleaning.

To change the original colour:

spray non-diluted SUEDE COLOR or diluted with water 2:1 once or twice. Before spraying the second time, assure that suede are well dry.

It is advisable to spray outdoors or under exhaust-fan at a temperature of 20-35°C. Use a compressed-air spray gun with a 0,8-1 mm nozzle (pressure 2 bar).

SUEDE COLOR can be stored for 1 year.

The bottle should always be tightly closed after drawing.

Keep the product in an airy room. Keep away from heat sources.

Plastic bottle of Kg 1

Codes: 745x01 (x = 2,3,4,5,6,7,8)
